  **License Agreement**

This software is licensed under the terms of the GNU General Public License (GPL).

Press Page Down to see the rest of the agreement.

Gpg4win consist of several independent developed packages, available under different license conditions. Most of these packages however are available under the GNU General Public License (GNU GPL). Common to all is that they are free to use without restrictions, may be modified and that modifications may be distributed. If the source files (i.e. gpg4win-src-x.y.z.exe) are distributed along with the binaries and the use of the GNU GPL has been pointed out, distribution is in all cases possible.

What follows are the terms of the GNU GPL; for a list of individual copyright and license notices please see the installed README file.

In short: You are allowed to run this software for any purpose. You may distribute it as long as you give the recipients the same rights you have received.

How would you like to Configure Enigmail?

Would you like to setup Enigmail manually, or do you need assistance in the setup process?

- I prefer a standard configuration (recommended for beginners)
- I prefer an extended configuration (recommended for advanced users)
- I prefer a manual configuration (recommended for experts)
- I want to import my settings from a previous installation

Create or Import OpenPGP Keys

You don't seem to have any OpenPGP keys yet. Would you like to create a new key, or do you want to import keys from a file?

I want to create a new key pair for signing and encrypting my email

I have existing public and private keys that I would like to import

Create Key

Create a new Key Pair

This dialog will create a pair of two keys:
 Your **public key** is **for others** to send you encrypted emails. You can distribute it to everybody.
 Your **private key** is **for yourself** to decrypt these emails and to send signed emails. You should give it to nobody.

Your **passphrase** is a password to protect your private key. It prevents misuse of your private key. The passphrase should be a phrase containing at least 8 characters, digits and punctuation marks. Umlauts (e.g. ä, é, ñ) and language-specific characters are **not** recommended.

Account / User ID:
 Tim Preuss <tim.preuss02@gmail.com> - tim.preuss02@gmail.com

Passphrase

Please confirm your passphrase by typing it again

Passphrase quality:

Key Creation

Your key is now being generated

Key Generation Console

NOTE: Key generation may take up to several minutes to complete. Do not exit the application while key generation is in progress. Actively browsing or performing disk-intensive operations during key generation will replenish the 'randomness pool' and speed-up the process. You will be alerted when key generation is completed.

Your Key is Generated

In case your private key gets lost or compromised, you might need to revoke your public key such that others don't continue to use your old key. For this purpose, you need a revocation certificate. You will be prompted to enter your password for this.

[Create Revocation Certificate](#)
