```

cpu-info - Notepad
File Edit Format View Help
REM This batch file collects information about the central processing
REM This batch file uses the WMIC command in windows
REM This only works on windows systems.
REM Preuss 9/9/2014

REM This identifies the computer.
echo 'This is the system name.' >> cpu-info.txt
echo %COMPUTERNAME% >> cpu-info.txt

REM This gathers the information from the cpu
echo 'This is the cpu information.' >> cpu-info.txt
wmic /output:info.txt cpu list

type info.txt >> cpu-info.txt

REM This displays our gathered information
notepad cpu-info.txt

```
